Education

Sharda University — Greater Noida, India
Bachelor of Technology in Computer Science; GPA: 7.8/10 — *Sept 2022 – May 2026*

Summary

Software Engineer skilled in **Java, Python, JavaScript** and **TypeScript**, with experience designing **scalable distributed systems** and **REST APIs**. Familiar with **OOP, data structures, algorithms, SDLC**, **CI/CD pipelines**, and **Agile methodologies**. Proficient in **AWS, Docker, Kubernetes**, and **fault-tolerant architecture design**.

Technical Skills

Cloud & DevOps: AWS (EC2, S3, Elastic IP), Docker, Kubernetes, GitHub Actions, GitLab CI/CD, Nginx
Programming Languages: Java, Python, TypeScript, JavaScript, C
Backend & Frameworks: Node.js, Express.js, FastAPI, REST APIs, Socket.IO, WebSockets
Databases: MySQL, PostgreSQL, MongoDB
Core CS & Frontend: Data Structures & Algorithms, OOP, Problem Solving, SQL, React.js, Next.js
Tools & Practices: Git, Linux/Unix, Postman, Agile, SDLC, Unit Testing, Code Reviews

Experience

CipherByte Technologies — Remote
Full Stack Developer Intern — *May 2025 – Jul 2025*

- Built a **social media web application** with post feeds, user authentication, and real-time interactions using **Node.js**, **Express.js**, and **Socket.IO**.
- Reduced manual deployment steps by **40%** by containerizing **3+ services** with **Docker** and **Kubernetes**, automating build and release workflows via **GitLab CI/CD**.
- Designed and deployed **5+ scalable REST APIs** with clean architecture, improving API reliability and reducing error rate by **30%** under concurrent user load.
- Improved release quality by **25%** through **Agile** sprint participation and **code reviews**, catching integration issues pre-deployment.

Projects

SplitAI | *Docker, AWS EC2, Nginx, GitLab CI/CD, Next.js, MongoDB* — GitHub

- Built a **fault-tolerant distributed system** supporting **50+ concurrent users** with secure authentication, real-time data sync, and automated expense splitting reducing manual effort by **90%**.
- Containerized backend with **Docker**, deployed on **AWS EC2** with Elastic IP and **Nginx** reverse proxy achieving **99%+ uptime**; reduced deployment time by **60%** via **CI/CD** automation.
- Designed **atomic MongoDB transactions** eliminating race conditions across concurrent settlements, ensuring **zero data loss** under peak load following **SDLC** best practices.

Code-Collab | *Socket.IO, Node.js, TypeScript, Firebase, MongoDB, Render* — GitHub

- Designed **distributed event-driven architecture** with **Socket.IO** handling **20+ concurrent users** at **<100ms** latency with **0%** session conflict rate.
- Deployed **decoupled microservices** — backend on **Render** with WebSocket support, frontend on **Vercel** — enabling independent scaling with **99%** session reliability.
- Integrated **Firebase Authentication** and **MongoDB** securing **100%** of user sessions with persistent multi-user state management.

Real Time-Tracker | *Node.js, Socket.IO, WebSockets, Leaflet.js, JavaScript* — GitHub

- Built low-latency location tracking app with **<200ms** update frequency using **WebSockets/Socket.IO** for bidirectional communication across **multiple simultaneous users**.
- Integrated secure **JWT** authentication protecting **100%** of user sessions with **Leaflet.js** for interactive real-time map rendering.

Certificates

Deloitte Australia: Technology Job Simulation, Forage, Jun 2025
Tata Group: GenAI-Powered Data Analytics Job Simulation, Forage, Jun 2025
Postman: Postman API Fundamentals Student Expert

Achievements

Solved 350+ problems on LeetCode
Research Paper - GSIR 2025: Presented paper on AI-based startup–investor matchmaking at GSIR 2025.
GSSoC 2025 - Tech Contributor: Contributed to open-source projects through collaborative development.
