Education

Sharda University — Greater Noida, India
Bachelor of Technology in Computer Science; GPA: 7.9/10 — *Sept 2022 – May 2026*

Summary

Full Stack Developer skilled in **React, Next.js, Node.js** and **TypeScript**, with experience building **scalable distributed web applications** and **REST APIs**. Familiar with **OOP, SDLC, Agile methodologies**, and **CI/CD pipelines**. Proficient in **MongoDB, PostgreSQL, AWS**, and **Docker**.

Technical Skills

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving, SQL
Programming Languages: Java, TypeScript, JavaScript, Python, C
Frontend: HTML5, CSS3, Tailwind, React.js, Next.js, Responsive Design
Backend & Frameworks: Node.js, Express.js, FastAPI, Socket.IO, WebSockets, REST APIs
Databases: MySQL, PostgreSQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, Elastic IP), Docker, GitHub Actions, GitLab CI/CD, Nginx, Kubernetes
Tools & Practices: Git, Postman, Agile, SDLC, Unit Testing, Code Reviews

Experience

CipherByte Technologies — Remote
Full Stack Developer Intern — *May 2025 – Jul 2025*

- Designed scalable **REST APIs** using **Node.js** and **Express.js** with clean architecture.
- Built **real-time features** using **Socket.IO** ensuring low-latency communication
- Collaborated in **Agile** sprints contributing to system design discussions and **code reviews** for scalable backend services.

Projects

SplitAI | *Next.js, React, Tailwind CSS, Auth.js, MongoDB, Clerk, Docker, AWS EC2, Nginx* — GitHub

- Built a scalable expense management system with secure authentication, real-time data sync, and automated expense splitting and settlement calculations.
- Containerized with **Docker**, deployed on **AWS EC2** with Elastic IP and **Nginx** reverse proxy; frontend on **Vercel** for a fully decoupled, production-ready architecture.
- Designed **fault-tolerant architecture** with decoupled frontend and backend services ensuring reliability under concurrent user load; followed **SDLC** practices with **CI/CD** automation.

Code-Collab | *React.js, Node.js, Express.js, Socket.IO, Firebase, MongoDB, TypeScript* — GitHub

- Designed and developed a real-time collaborative coding platform using a **distributed event-driven architecture** with **Socket.IO**, handling concurrent multi-user state across decoupled services at low latency.
- Integrated **Firebase Authentication** for secure user management and **MongoDB** for persistent session and user data storage.
- Deployed backend on **Render** with WebSocket support and frontend on **Vercel**, achieving a fully decoupled, production-ready architecture.

Real Time-Tracker | *Node.js, Socket.IO, Leaflet.js, WebSockets, JavaScript* — GitHub

- Built a low-latency real-time location tracking app using **WebSockets** and **Socket.IO** for bidirectional communication and **Leaflet.js** for interactive map rendering.
- Integrated secure **JWT** authentication for protected user sessions.

Certificates

Deloitte Australia: Technology Job Simulation, Forage, Jun 2025
Tata Group: GenAI-Powered Data Analytics Job Simulation, Forage, Jun 2025
Postman: Postman API Fundamentals Student Expert

Achievements

Solved 350+ problems on LeetCode
Research Paper Presentation - GSIR 2025: Presented paper on AI-based startup–investor matchmaking at GSIR 2025.
GSSoC 2025 - Tech Contributor: Contributed to open-source projects through collaborative development.
